McGREGOR'S FALL CATALOG

OF BULBS, PLANTS AND SEEDS

FALL 1920

FLOWERING BULBS

produce remarkably beautiful flowers, unsurpassed by any other plants in the floral kingdom, and, besides, many of them are delightfully fragrant. They comprise an endless variety in habit, form, size, color, and are adaptable for many purposes, many of them flowering equally well under either garden or house culture. Among other merits of bulbs is the certainty and perfection with which they bloom.

Hyacinths are among the most popular. Their wax-like bell-shaped flowers, borne in buxom trusses, are of matchless beauty and also delightfully fragrant. The colors, shades and tints are wonderfully varied, from purest white through bluish, pink, rose, etc., to deepest red, and from daintiest porcelain through blues to black purple, from cream through yellows to orange and rosy apricot, etc. Hyacinths succeed with every one and may be had in flower throughout the winter, grown either in pots of soil or glasses of water, while for gardens or bedded on the lawn they are gorgeously effective when in flower during the spring.

Double Hyacinth President Roosevelt. Fine bright pink, large flower, well finished with good balls and strong stem. Price, 25c; 3 for 72c; 6 for \$1.42; 12 for \$2.70; per 100, \$17.50.

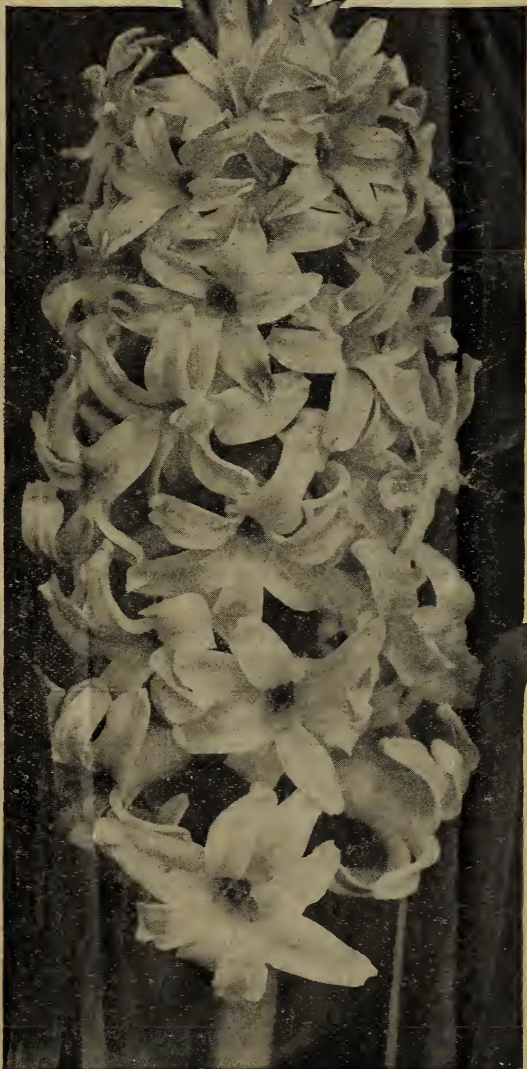

PREPARED FIBRE FOR BULB GROWING

This is something new in which to grow and flower bulbs during winter in bowls, jardineres, fern dishes, etc., without drainage. A splendid advantage for townspeople or city people who have difficulty in obtaining good potting soil.

Prepared Fibre is composed of excellent Holland peat, combined with other materials, such as charcoal, crushed oyster shell, etc., to keep it sweet. It does not dry out as quickly as soil nor sour if too much water is given. It is light, clean and nice to handle, and if used as directed will encourage healthy growth and perfection of bloom. By our own testing of this material we have found that the bulbs come into flower two weeks earlier when planted in fibre, and that the flowers are much larger.

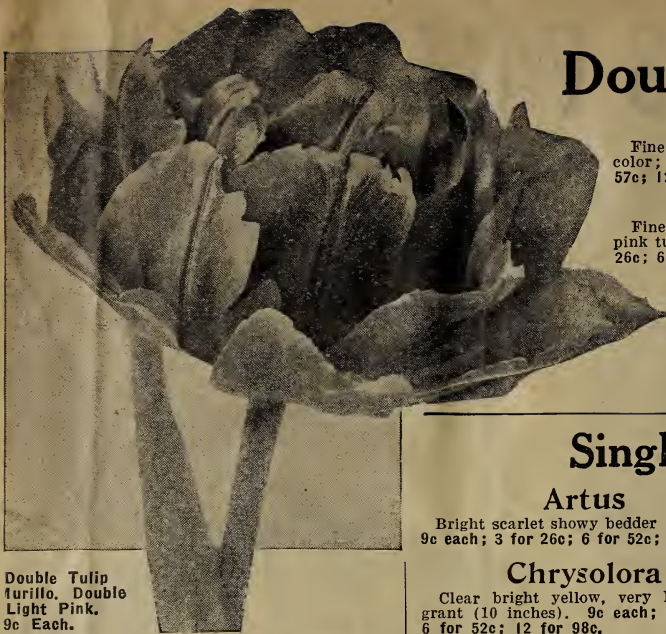

An excellent medium in which to grow Hyacinths, Tulips, Narcissus, Crocus, Freesias, etc. Full directions sent with every package.

Price, 25c per quart; 4 quarts for 80c; 8 quarts for \$1.50.

HARDY GARDEN LILIES

Special Notice Many of the finest Lily bulbs come from Japan, and are not received in this country until October and November. They cannot be obtained earlier, as the bulbs are not shipped until fully matured. Where bulbs are offered for sale earlier than the latter part of November, they are generally bulbs which have been kept in cold storage, and thereby have lost much of their vitality, and will not keep as well as fresh bulbs. Therefore, we advise the preparation of the Lily beds or borders early in autumn, covering them with four to six inches of leaves or litter of any kind. This will keep them open, and admit of the planting of the bulbs if exportations should be delayed.

BEAUTIFUL DECORATIVE FERNS

The Boston Fern

"No Single Decorative Plant has ever proven more popular."

This fern is one of the best known varieties grown, and in the long years of its cultivation has proven worthy of a place in every home. Called the Fountain Fern, for its exceptionally graceful habit of growth, and until the introduction of other types was considered the most valuable house plant to be had.

24c

It is of easy culture and a very rapid grower, producing fronds of unusual length, frequently measuring six to eight feet in length. Its unusual freedom of growth without especial care has made it popular with all admirers of house plants, and although there have been many new introductions from this the parent plant, it is still the most popular variety in cultivation. Price, nice young plants, 24c each; 3 for 68c; stronger plants, 37c; larger plants, 75c; extra large plants, \$1.56; heavy selected plants, \$2.50.

The Original Boston Fern, *Nephrolepis Bostoniensis*. Its freedom of growth without essential care has made it popular with admirers of beautiful house plants. 24c, 37c, 75c, \$1.56, \$2.50.

The Grand New Dwarf Fern "Teddy Jr."

This magnificent Fern is a sprout from the now famous Roosevelt Fern, and while it produces a shorter frond it retains all the valuable characteristics of the parent. Fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds to their charming decorative effect. It is such a compact, vigorous grower that it will thrive under most adverse conditions. Price, nice young plants, 29c each; 3 for 83c; stronger plants, 62c; larger plants, \$1.56; heavy selected plants, \$2.00.

THE PLUMED FERN

Scholzeli

The Ideal Plumed Fern

With the recent introductions of Ferns which have come from the original Boston type, there is no variety with heavier and more plummy fronds than Scholzeli. Its foliage is quite different from all other varieties of the family, and stands in a class by itself. The plant makes a comparatively dwarf compact growth, the fronds, while dense, firm and rigid, are still graceful as the illustration shows. The foliage is also of a darker green than the original Boston Fern. All in all, it forms an ideal plumed Fern, possessing all the merits of former introductions while having a distinctive character that makes it of especial value. Price, nice young plants, 30c each; 3 for 85c; stronger plants, 56c; larger plants, \$1.10; heavy selected plants, \$2.00.

HARDY EVERBLOOMING ROSES

For Fall Planting

Winter Protection The Teas and Hybrid Teas, or Monthly Blooming Roses will require protection throughout the country excepting in the far Southern states. It is well, however, to protect all Roses from severe winters. The important point is to keep the ground around the base of the plants dry. The plants should be first covered with rough material of some kind to allow of a circulation of air over the surface of the ground, and this rough covering can be topped with leaves, manure or other coarse material such as will shed the winter storms of rain, sleet and snow. Plants in winter should be kept dry for the same reason that we keep ourselves dry. Remember, there is much more in common, or should be, between animal and plant life than is practically acknowledged by most of those who strive for success in the growing of Roses. One must always remember that both demand for their perfect development a sufficiency of nourishing food and drink, a pure atmosphere, a temperature as equable as possible, careful protection and thorough cleanliness. Let everyone who plants Roses bear this in mind, and we shall find a wonderful improvement in the quality and quantity of the flowers.

"The Most Decorative of the Begonia Family."

Rex Begonia

The Mammoth Leaved Rex Begonia with its rich metallic foliage gives us the most decorative variety of the Begonia family, 40c.

The Rex division of the Begonia family has been a great favorite. In no other class of plants do we find the rich metallic foliage, lustre and various colors so satisfactorily blended as here. We find colors of bright green, silver colored, reddish bronze, as well as varieties of bright rosy plum color. The plants are grown exclusively for the great beauty of their foliage, as they make unexcelled pot plants or bedding plants when they can be planted out of doors in shaded situations. For rockeries they are unexcelled and they grow luxuriantly along foundations where shaded, and where the Tuberous Rooted Flowering Begonias in all their wonderful shades of color do so well. The soil should be light and porous. Price of Rex Begonia, good, strong established plants, 40c each, 3 different varieties for \$1.26, 6 for \$2.52; \$4.76 per dozen. Larger plants, 75c each.

POPULAR DECORATIVE PLANTS

Lace Fern

One of the Most Beautiful and Popular Foliage Plants of the Century.

A Decorative Plant of Unusual Value.

(*Asparagus Plumosus*) — The family of *Asparagus* plants comprises a number of varieties. Some are climbers, some drooping or trailing, some erect and bushy. Many of them are highly prized for their beautiful and graceful foliage, and the two varieties which we list on this page are practically the most popular and valuable of all. The variety *Plumosus* (*Asparagus Plumosus Nanus*) is a tall, climbing, decorative plant and one of the rarest and of delicate beauty. Its bright green foliage is extremely fine and plume-like. The fronds grow from six to eight inches in width, and when cut retain their color and shape for weeks. The plant may be grown as a pot plant, a bushy form or climbing. Florists grow the *Asparagus Plumosus* to give them rich green strings of foliage to be used similar to the popular *Smilax*. *Asparagus* possesses the advantage of being more graceful and its foliage finer than those of the most delicate Fern. As a house plant it will thrive under practically all conditions. The *Asparagus* likes a good rich soil and fairly warm temperature. The plant does best and carries the richest color of foliage when it is kept in a growing condition through a plentiful supply of nourishment. *Asparagus* is comparatively free from diseases, and with all its good qualities and practically no bad ones, it ranks as one of the first decorative plants to be had. Nice young strong growing plants, 29c each; 3 for 83c; 12 for \$3.13. Larger plants, 56c each; 3 for \$1.60; 12 for \$6.05.

J. K., Brooklyn, Ill.: "The Ferns you sent me are surely beauties and are doing very fine."

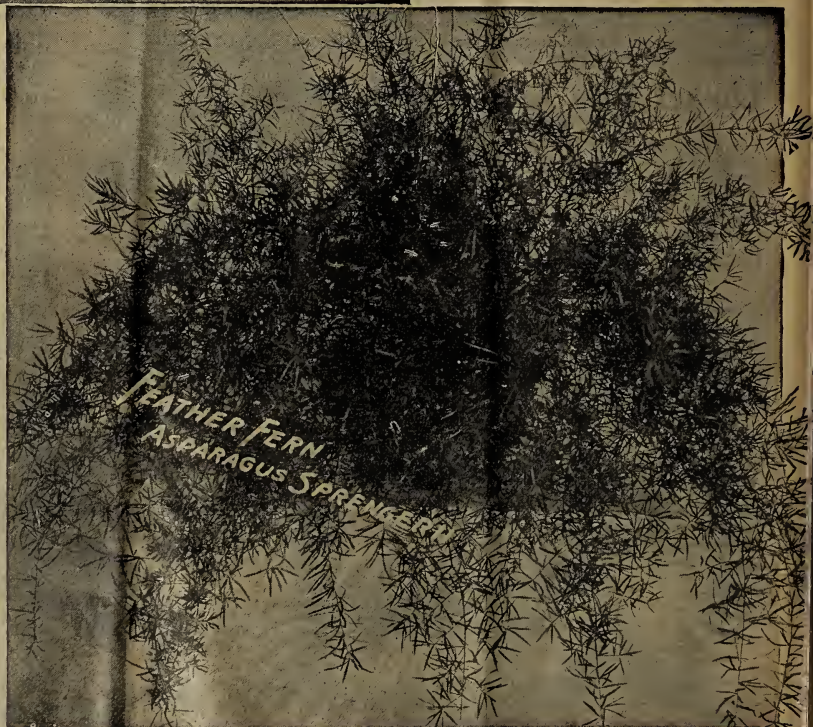

Asparagus Plumosus (Lace Fern.) Foliage of richest green, 29c and 56c.

Feather Fern

Unsurpassed for Window Boxes or Hanging Baskets. Foliage Graceful and Drooping. Dense Glossy Green.

(*Asparagus Sprengerii*) — The *Asparagus Sprengerii* gives us a plant of the bushy and drooping form of the *Asparagus* family. The foliage is composed of dense, glossy green, graceful and drooping branches. The Feather Fern or *Asparagus Sprengerii* is probably of a hardier nature than the *Plumosus*, and subjects itself to wider usage. It is especially valuable for window box and hanging basket planting, for vases and as specimens when grown in pots or as tub plants. The Feather Fern or *Asparagus Sprengerii* gives us a more valuable house plant, being one of easy culture, the sprays growing four to five feet long, and when the foliage is used for cut flower work it retains its freshness for an unusual length of time. The Feather Fern is particularly free from troublesome insects or diseases, and in this has one advantage over the large family of decorative Ferns of the Boston Fern type. The plants are of rapid growth, succeeding well in ordinary rich soil, and there is every reason to believe that all plant growers can have the greatest success with them. Price, nice strong growing young plants, 28c each; 3 for 80c; 12 for \$3.00. Larger plants, 54c each; 3 for \$1.54; 12 for \$5.83.

The Best All-Round Plant Grown

THE IDEAL FERN Roosevelt

A Notable and Valuable Novelty.
Wins Prizes Everywhere.

The popular Boston Fern has had the most phenomenal sale of any decorative plant grown. Fronds broad and heavy, often measuring 6 inches or more across, and five or six feet long. Owing to the weight of the foliage, the plant assumes an exceedingly massive yet graceful appearance, and owing to the fullness of the fronds even small plants make much more symmetrical and beautiful plants than the popular Boston Fern. The divided pinnae or miniature fronds which are so gracefully arranged, keep growing constantly, overlapping each other and showing two shades of green, while the center and main part of the frond is rich dark green, the contrast producing a beautiful effect.

Price, nice young plants, 32c each; 3 for 90c; stronger plants, 53c; larger plants, 98c; heavy selected plants, \$1.68.

Price, nice young plants, 34c; 3 for 98c; larger plants, 60c; larger plants, \$1.12; heavy selected plants, \$1.56.

The Ostrich Plume Fern, Whitmanii, 35c, 55c, 98c.

THE OSTRICH PLUME FERN WHITMANII

Fronds as Feathery as Ostrich Plumes

Whitmanii is one of the few feathery foliage Ferns which every one can succeed in growing. It is a healthy, vigorous grower, constantly unfolding fresh fronds, which often attain a width of twelve inches. Each frond is delicately and finely cut, possessing such elegance of form and willowy grace as to be compared to a beautiful ostrich plume. Its feathery, drooping form and compact, luxuriant growth will make the most sordid surroundings assume cheerfulness and verdant beauty. In decorative effect it far outdistances many of the other varieties of the family. It has taken gold medals wherever shown. Price, nice young plants, 35c; 3 for \$1.00; stronger plants, 55c; 3 for \$1.57; larger plants, 98c; heavy selected plants, \$1.67.

Under such conditions Ferns require very little attention and amply repay in satisfaction and genuine pleasure. Strong rooted plants, 55c; 3 for \$1.57; 6 for \$3.14; 12 for \$5.85.

CHOICE DECORATIVE PLANTS

Ficus Elastica—Rubber Plant, \$1.50.

Broad Leaved Croton. \$1.00.

Crotons

In the Croton we find one of the most beautiful plants we have. Brighter than Coleus in coloring and as easily cared for. The leaves are all more or less veined in margin, sometimes entirely variegated. The shades are yellow, orange and crimson. The leaves broad and oak leaf shaped, arching gracefully. The bright coloring of the plants makes them extremely popular. Broad and narrow leaved varieties. Price, by express only, \$1.00 each.

Kentia Fosteriana, 45c, 75c, \$3.00.

Rubber Plant

(*Ficus Elastica*)—*Ficus Elastica*, better known all over the country as the Rubber Plant, is undoubtedly one of the most satisfactory house plants that has ever been distributed. The plant is of tropical nature, being at its best under moist conditions and high temperature, but if well cared for, the foliage kept clean, good drainage provided, and the soil kept sufficiently moist, it will continue growing throughout the year. Branched plants are produced by simply cutting out the top, which should be done in the early spring. The Rubber Plant does not require more than what might be termed good garden soil. Its wonderfully thick leathery leaves enable it to stand excessive heat and dryness, while its deep, glossy green foliage always presents a showy appearance. It is particularly adapted to house culture and for porch decoration. Large plants, by express, \$1.50.

Dracena Terminalis, 75c, \$1.50.

Kentia Fosteriana

One of the finest plants of any of the Palm family for general cultivation, being almost impregnable against disease. Leaves deep, glossy green, fan-shaped, split deeply into segments. Very similar to *Kentia Belmoreana*, but with broader foliage. Price, nice plants, 45c; larger plants, 75c and \$3.00 each, by express only.

Fan Leaf Palm

(*Latania Borbonica*)—This is the typical Palm and is more largely grown than all other varieties combined (possibly excepting the *Kentias*). Its vigorous, healthy habit and large, glossy green, fan-like leaves commend it to all. Nothing is more satisfactory as a decorative plant than a well-grown specimen of *Latania*. This is the Palm from which the Chinese Palm Fans are made. Adapted to all decorative purposes within or without doors. Price, nice young plants, 30c each; larger plants, 60c each; large specimen plants, \$2.00, by express.

Dracena Terminalis

A superb species, with rich, crimson foliage, so marked with carmine-pink and creamy-white that words cannot describe the exquisite coloring. It is a rapid grower, and for room adornment or as a vase plant for outdoor use it is indispensable. Price, fine plants, 75c each; larger plants, \$1.50.

Screw Pine

(*Pandanus Utilis*)

As an ornament for the window, its glossy dark green, serrated foliage renders it unusually attractive. It is also largely used to decorate the halls in our private residences, and shows grandly on the lawn when grown to sufficient size. Price, nice plants, \$1.50 each.

BIRD NEST FERN

(*Asplenium Nidus-Avis*)—An attractive and useful decorative plant having broad, heavy fronds arranged in a whorl, giving it the name of Bird Nest Fern. The leaves are bright green and in large plants grow two to three feet long, from three to nine inches wide. The size and shape of the leaves would suggest the leaves of the banana plant excepting that they are of a deeper and brighter green color. The plants like plenty of moisture at the roots, but should not be allowed to stand in water for any length of time. They are generally grown in equal parts of rich soil and leaf mold with sand or something provided in the bottom of the pots for good drainage. Because of its distinct and tropical effect of its foliage it is one of the most popular decorative plants grown, and is used freely with other large ferns and palms in hotels and city windows where the introduction of foliage plants prove especially attractive. Price, 62c each; 3 for \$1.75; \$4.76 per dozen.

The "Fluffy Ruffles Fern"

This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth, much more compact, and its irregular shaped fronds, which give it the name of "Fluffy Ruffles Fern." So formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. Nice young plants, 45c each; 3 for \$1.22; 12 for \$4.86. It is a compact, biggest grower that will thrive under all ordinary conditions, making an exceptionally rapid growth and producing a plant in rare beauty and perfection in a dwelling house, without much care and attention. The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. It is an improved variety and the best of its type. Nothing is daintier or more exquisite than well-grown specimens in any size. Nice young plants, 45c each; 3 for \$1.22; 12 for \$4.86. Large plants, \$1.00 each; 3 for \$2.85; 12 for \$10.80.

Give the plant plenty of sun, and add to the quantity of water as the flower comes on. When done flowering, which will be late in the spring, the plant must be allowed to rest.
